Inspired: The Harrell Health Sciences Library Renovation Update

The Harrell HSL Renovation blog is now available via the library website—just click on the blue Inspired Harrell HSL Renovation button. As we progress from design to construction we will continue to add information, including the construction schedule. Check back regularly, especially as we enter the construction phase this coming fall. The information posted to the blog will help you understand what will be happening within the library on any given day.

We are currently completing the schematic design phase, which included engineering layout and systems, fire and security, IT technology/infrastructure, raised access flooring and modular walls, and the overall floor plan. This information will be presented to senior leadership for approval. We are now starting the design development phase of the project. This is the fun part where we decide on the interior palette, i.e. the color scheme for flooring, walls, finishes, upholstery and accents. This phase also includes choosing furniture and millwork, identifying the technology that will be integrated into the spaces, lighting, and signage. We will be seeking input as we move through this phase. We want to make sure the furniture is comfortable and functional, the technology is appropriate for the various spaces including the small study rooms, and we have plenty of outlets and charging stations. (Continued next page)
Included with this article are two 3-D renditions that show the concept and direction for the design of the new library space. Although these are not actual images of the end product, they give you an idea of how the space will look and function.

Once the design development phase is complete we will again present to senior leadership and with their approval we will move into developing the construction documents. With the construction documents finalized we will bid the project. As noted in my last newsletter update, we still expect construction to begin sometime in the October, November timeframe. We hope to have our grand opening celebration early in 2017.

We are excited to be on this journey and when all is said and done, the library will be a showcase for Penn State Hershey inspiring everyone to be their best. Stay tuned for updates as we continue to develop the design and move closer to our shared vision of the 21st century library and learning commons.

Keep tabs on renovation progress—Visit the HHSL Renovation Blog at the library website. Find construction schedules, latest updates, and FAQs about the renovation.

We are committed to keeping faculty, students, and staff informed during renovation.
Learning at the Library

In 2013-14, library faculty doubled the number of individuals reached through information/instruction sessions compared to five years earlier—with no increase in faculty size.

Library faculty recently held a number of successful educational events for students, faculty, and staff of Penn State Hershey. We created a number of new workshops that were very well received. If you or your research group needs training in any of these areas, contact us!

What We’re Doing . . .

Our faculty participated in several different ways at the 2015 Medical Library Association conference.

Cynthia Robinson was part of a panel discussing “Difficult Conversations: Strategies to make sure they enhance rather than ruin your leadership.”

Robyn Reed presented 3 posters: “Advancing the research mission: The library’s role in supporting biomedical researchers,” "A Comparison of the roles of medical and science informatics librarians" and "Saving time with the library: A proactive approach to engaging new faculty."

David Brennan presented 2 posters, “Using the liaison program in collection assessment and development" and “Conversion of journal citation data for systematic review analysis.” He also recently published an article, “Collection assessment and the library liaison program: A practical focus,” in the journal, Pennsylvania Libraries: Research and Practice.

Amy Knehans and Esther Dell presented a poster, “Establishing, Marketing, and Expanding a Fee-based Systematic Review Information Service.”

Nancy Adams attended the Harvard Macy Institute in May, funded by the Vice Dean for Medical Education.
Resource Highlight: Web of Science

By David Brennan

Web of Science (WoS) from Thomson Reuters, is a wide-ranging resource that in addition to indexing a broad cross-section of sciences and social sciences and specializes in citation analytics.

A key feature in all WoS databases is the ability to do a cited reference search, allowing you to locate articles that cite a specific paper. “Cited reference searching” essentially searches the literature “forward” by looking for articles that cite another one of interest, often yielding very relevant results. To find out how, watch this short video: https://www.youtube.com/watch?v=9jcZlwf_VZA

WEB OF SCIENCE™

Visit the Harrell Health Sciences Library website (http://med.psu.edu/library) or direct via this link: http://alias.libraries.psu.edu/ERESOURCES/PSU01188 (requires Penn State accessID from off campus)

Essential Science Indicators is a new feature of WOS. It compiles science performance statistics and trends data derived from Web of Science Core Collection data. Within Essential Science Indicators, you can:

- Rank authors, institutions, countries and journals across 22 broad disciplines
- Conduct analyses of scientific literature:
  - Identify top researchers or institutions in specific disciplines
  - Identify trends and emerging areas of research
  - Who is publishing the ‘hottest’ papers in a field?

- Impact Factor uses data from most recent JCR data year + prior 2 years

Essential Science Indicators
- Data from most recent 10 year period
- Limited document types
- Top performing authors, institutions, countries, journals, and papers in 22 broad categories
HHSL’s Research Data Event a Success: 75 Attendees

On April 30, the Harrell Library hosted “Research Data: Compliance, Ownership, and Preservation.” The purpose of the event was to allow researchers the opportunity to learn from experts about PSU data policies on issues such as data security, ownership and intellectual property, as well as learning about PSU resources to help manage data. The 75 attendees were encouraged to bring questions they had on data and data management regarding legal issues, IRB policies, resources including REDCap and i2b2 and data services.

We’d like to extend a special thank you to our presenters: Michael Brignati, PhD, JD, Penn State Associate General Counsel; Bari Dzomba, Doctoral Candidate, MS, Research Data Warehouse/Research Informatics; Terri Shkuda, REDCap Administrator, Research Informatics, IT; and Rosanne Pogash, MPA, Manager, Data Management Unit, Public Health Sciences.

Please email herref@hmc.psu.edu for a link to the recording. ePass login required to view. —Robyn Reed

Point of Care Tools for Clinicians will be offered Wednesday, June 3 at 7:30am via Adobe Connect. Join us for an overview of clinical information sources offered by the library and how to receive automatic alerts. Please RSVP to receive the link to the presentation.

“Career Development for Graduate Students” Collection

Now Available!

Explaining Research: How to Reach Key Audiences to Advance Your Work and many other titles are now available for your use at Harrell Health Sciences Library. Browse the list of books, see the display near the library entrance, or ask us at the library’s service desk.

The Library thanks Dr. Michael Verderame and the Office of Graduate Education for providing this useful resource.
PubMed Quick Tip: Use the Clipboard

This tip always gets a “Wow! I like that!” from our users.

Collect citations of interest during your search session by clicking “Send to” at the upper right of the results list; and selecting “clipboard.” This saves your citations to a clipboard in PubMed which can then be emailed or imported to EndNote at the end of your session.

Feedback is welcome! Email the editor: nadams@hmc.psu.edu

ORCID provides a persistent digital identifier that distinguishes you from every other author and supports automated linkages among all your professional activities.

For those with common last names or publications under multiple names, ORCID helps to disambiguate your name. ORCID is used by a growing number of publishers, funders, and professional societies. Questions? Contact us at herref@hmc.psu.edu.
