Welcome to the 2015-2016 academic year!! It’s always a pleasure to see so many familiar faces returning for another year. We also want to extend a warm welcome to the incoming medical, physician assistant and graduate students, as well as recently hired faculty and staff.

SciVal and SciVal Funding Acquired by PSU
Penn State University, through the Office of the Vice President for Research, has acquired an institutional license for both the SciVal and SciVal Funding intelligence tools. The purchase of these Elsevier products represents a significant investment by Penn State.

SciVal will help us assess our institutional research performance from a variety of perspectives, including comparing our performance against the other Big Ten institutions. The database is prepopulated with ≥ 7,000,000 researchers from over 5,500 institutions and 220 countries worldwide. SciVal uses Elsevier’s Scopus as its data source and mines both Scopus and Science Direct usage data to convey the impact of the research community. Scopus includes over 33 million publication records from 21,915 unique journals.

SciVal pre-populates author profiles, which enables users to verify output and combine them to create groups of researchers under a specific department. A user can view Penn State Hershey, Penn State University, or combine them to get a snapshot of the entire university. SciVal is broken down into four functional areas: 1) Overview, where you can get a high-level overview of various research entities, both people and institutions, 2) Benchmarking, where you can compare against researchers, institutions, other groups, etc., 3) Collaboration, where you can explore collaboration networks and identify possible collaborators, and 4) Trends, where you can get information on the current scientific trends and identify rising stars.

SciVal Funding is a tool to help researchers identify funding opportunities targeted to their interests and areas of research. A user can set up a “My Profile” page which will identify targeted funding opportunities and automatically send emails notifying him/her of the prospect. Funding can be narrowed to specific funding bodies, i.e.: government, corporate, private and
others, or encompass the entire funding landscape. SciVal Funding covers grants from Australia, Canada, the European Commission, India, Ireland, New Zealand, Singapore, South Africa, the United Kingdom, and the United States.

When you connect to SciVal for the first time you will be asked to set up an ID and password. This ID and password will work for both SciVal and SciVal Funding. You must be on the Penn State Hershey or Penn State University networks in order to set up your account. SciVal is authenticated using the institution's IP ranges. For more information about SciVal and SciVal Funding you can contact the Harrell Health Sciences Library at 717-531-8634 or Robyn Reed, Biomedical Informatics & Emerging Technologies Librarian at 717-531-6137 or reed4@hmc.psu.edu. Training will be forthcoming, watch for more information.

---

Keep tabs on renovation progress—Visit the HHSL Renovation Blog at the library website. Find construction schedules, latest updates, and FAQs about the renovation.

We are committed to keeping faculty, students, and staff informed during renovation.

---

The George T. Harrell Health Sciences Library is pleased to announce our fifth annual READ Poster Recognition Award Reception.

**READ POSTER RECOGNITION**

**OCTOBER 15, 2015 AT 4:00 P.M.**

**HARRELL HEALTH SCIENCES LIBRARY**

---

The following individuals are being honored for their contributions to the library. Each honoree will be featured on a poster that will be displayed in the library to promote learning and scholarship.

**Rose Baron**
Administrative Coordinator, Office for Diversity and Inclusion

**Sarah Bronson Ph.D.**
Director, Research Development and Interdisciplinary Research, Co-Director Junior Faculty Development Program, Director - Graduate Core Curriculum

**Dwight Davis M.D.**
Physician, Professor of Medicine
Senior Associate Dean for Admissions and Student Affairs

**Jeffrey Miller, M.D.**
Physician, Professor of Dermatology

**David Richard, M.D.**
Physician, Associate Professor

**Russell Scaduto, Ph.D.**
Associate Professor
Manager of Multimedia Services

**Deb Tomazin**
Humanities Marketing Specialist and Graphic Designer
Managing Editor of Wild Orions
Student Liaison for Film and Creative Projects

**Michael Verderame, Ph.D.**
Senior Associate Dean of the Graduate School at Penn State University

Light refreshments will be served.
What We’re Doing . . .

David Brennan presented "CatSearch: Leveraging the web services API for collection assessment and development" at the 2015 SirsiDynix Northeast Regional Users Group (SNRG) Conference at State College. He also presented "Archival images digitization: Telling the Penn State Hershey story" at the "Lunch with the RML (Regional Medical Library)" series.

Amy Knehan's article, “Partnering to promote evidence-based practice by implementing Nursing Reference Center at the point of care” was published in Volume 15, Issue 2 of the Journal Of Hospital Librarianship.

Robyn Reed’s article, "Diving into data: Planning a research data management event" was published in Volume 4, Issue 1 of the Journal of eScience Librarianship.

Do You Board Review? ExamMaster for Specialty Board Review by David Brennan

The Harrell Health Sciences Library has a number of resources available for specialty board reviews. The primary one is ExamMaster.

This is a collection of exams in the following specialties:

- USMLE: Steps 1, 2 CK and 3
- Generic-Brand Name Drug Review
- Specialty Certification Exams
- Internal Medicine
- Family Practice
- Surgery
- Pediatrics
- Urgent Care
- OB/GYN
- NCLEX-RN & FNP
- SPEX
- PANCE/PANRE (for physician assistants)

Subject-specific exams:

- Biochemistry
- Anatomy
- Cytology/Histology
- Medical Microbiology
- Pathology
- Physiology
- Internal/Clinical Medicine
- Psychiatry

Continued on Page 4 . . .
Registration is required before using ExamMaster. This is free and can be done after connecting. To register, click on “Not Registered Yet?” and follow the prompts. You must use a valid Hershey email address to register.

Once logged in, you can access tutorials on how to use ExamMaster to set up your exams. Try the Get Started tutorial! Another good place to start is with the Overview of ExamMaster.

The library also has an extensive selection of Board review books that you can find in The CAT. Once in the list in The CAT choose "More Categories" in the "Limit These Results To" box at right to filter by specialty:

Some specialty organizations also provide sample board review questions (although most sell these as print or electronic books) For example, the Emergency Medicine Residents' Association posts questions, while the American Academy of Family Physicians posts information about the products they offer to support board reviews.

Additionally, a simple Google search for "board review" and the specialty you are interested in will result in a list of products and sites specific to that specialty.
Red Book: Newest Edition Available Online Soon by Esther Dell

The 30th edition of this frequently consulted reference was published on May 1, 2015. The Harrell Health Sciences Library has been providing electronic access to this title on the StatRef platform, and we learned that the new edition will not be available until January 2016. Please note that a print copy of the 2015 edition has been purchased and placed on Reserve at the Circulation Desk to provide access to the latest information until electronic access is available.

A link to the 29th Edition of Red Book (2012) can be found on the Library Home Page to provide convenience access. Users have indicated difficulty with searching for this title in The CAT to obtain the link to this resource.

Scholarsphere: How Your Colleagues are Using It by Nancy Adams

ScholarSphere, Penn State’s institutional repository offered by Penn State University Libraries, has been going strong for several years now. Several members of the Penn State Hershey community have successfully used ScholarSphere to share their work with the world.

Dr. Max Lang, professor emeritus of comparative medicine, recently published Founders, an account of founding faculty of the Penn State College of Medicine based on oral history interviews. Esther Dell, Harrell HSL’s interlibrary loan librarian, assisted Dr. Lang in finding a solution to providing access to the founding faculty’s CVs, letters of invitation, and oral history transcripts—important historical documents, but too voluminous for inclusion in the book. The solution was ScholarSphere, where the entire collection of historical documents now resides.

Dr. Paul Haidet of the Office for Scholarship in Learning and Education Research tweets at @myheroistrane about medical education topics. He uploads PDFs of his published articles in ScholarSphere then tweets out the link to the article (for example, https://twitter.com/myheroistrane/status/598155567723458561) as an easy and quick way to publicize his work and get peer feedback on his work. Others “retweet” and his work spreads even farther.

The Department of Nursing uses ScholarSphere to store and share their scholarly and quality improvement work in the form of posters and PowerPoint presentations. Nursing faculty and staff submit their posters to a departmental administrative associate who uploads them to ScholarSphere (although they could also do this on their own). Now people in the department can include links to their posters in CVs or share the links with colleagues. View their work here: https://scholarsphere.psu.edu/collections/r781wk48c

ScholarSphere is free and easy to use...simply upload your document, image, poster, or other file and decide whether you want to share it with Penn State only (requiring Access ID to view) or with the world. ScholarSphere is indexed by Google so it allows your work to be discoverable by scholars worldwide. Want to learn more? Email or call the library: herref@hmc.psu.edu or 717-531-8634.
The Harrell Health Sciences Library’s Upcoming Workshops

Harrell Health Sciences Library announces three FREE upcoming workshops taught by library faculty. Register now!

**Anatomy Teaching Resources** will be held Tuesday, September 22nd at 4-5pm in Room C2610. Let us introduce you to our anatomy resources guide with a specific focus on electronic atlases, streaming video, and Anatomy.TV, a 3-D interactive tool. Share ideas for how these can be used in teaching.

**My NCBI: A Useful Addition to PubMed** will be held Monday, September 28th at noon-1pm in Room C2610. Learn how this service can save you time and keep you updated in the literature in your field. Create customized search filters for PubMed, create automatic recurring searches in PubMed, and use “MyBibliography,” useful for populating NIH biosketches.

**Point of Care Clinical Tools** will be held Friday, October 2nd at 7:30am-8:30am in Room C2610. Here’s an introduction to the most useful clinical evidence-based information tools available through the library. We’ll demonstrate how several of the information sources listed in our point of care clinical tools guide work.
Welcome our Newest Library Faculty Member: Marie Cirelli

Marie Cirelli was recently hired as the Collection Access and Support Services Librarian. Her primary responsibility is ensuring that our users have seamless online access to library collections by communicating with our vendors and maintaining systems for electronic journals and other online resources. She also is the library’s liaison to Chaplain Services, Clinical Nutrition, Orthopedics, and Physical Medicine and Rehabilitation. After receiving her MS from Drexel University, she worked at the Pennsylvania College of Health Sciences in Lancaster where she gained experience in maintaining library systems and supporting students and faculty. In her off-hours, Marie enjoys working out, crafts and visiting the beach as much as possible!
